RLDA CONNECT

Message from Vice Chairman, RLDA

Dear RLDA Family,

Warm Greetings!

At the outset, I take this opportunity to wish you and your families a happy, healthy and rewarding New Year 2021.
2020 was a fruitful year for RLDA. During this year, we saw our hard work result in the achievement of several important milestones to position RLDA for the future. Our team has shattered all previous records of earnings as well as those of awarding of lease contracts in 2019-20.

RLDA has awarded tenders for long lease of land parcels worth Rs. 1553 crores during the year and has reported earnings of Rs. 933 Crore in Financial Year 2019-20. These milestones represent significant progress in building our earnings streams, strengthening our capabilities, and executing and expanding our project pipeline.

We all faced an unprecedented socio-economic crisis in the form of COVID-19. COVID -19 may be having a devastating impact on our industries, social lives, and personal grooming standards, but it also prompted an outpouring of creativity in all arenas. RLDA's performance during the crisis has been remarkable. We did not let our work, or our projects suffer during this time, and continued working unabated, be it webinars, virtual meetings, or online bidding, RLDA has successfully owned the "New Normal".

I feel proud while talking about our major projects and the amount of effort our people are putting in. One of them is our flagship project of redeveloping the New Delhi Railway Station on the Public-Private Partnership (PPP) model. The redeveloped NDLS station will be a one-stop destination for commercial, retail, and hospitality. RLDA has also invited online bids for the Re-Development of Vasundhara Loco Railway Colony in Varanasi and leasing over 35,000 sqm land parcel at Aurangabad. RLDA is undertaking the redevelopment of Gomtinagar Railway Station in partnership with NBCC. The re-development will boost real estate as well as the local economy. We have also taken the first step towards redevelopment of Panipat Railway Station and upgrade it in line with global standards and offer state-of-art amenities for the convenience of commuters.

Our Social Media presence on Twitter, Facebook, and LinkedIn is also growing by leaps and bounds. It has been a great vehicle for disseminating information and an asset that has kept us connected with people. Engaging in social interaction has provided RLDA a wide-scale contact through multiple channels. I would expect each one of you to take pride in each of our projects and share the publications, news articles, etc. through your social media accounts.

Much of the credit for RLDA's success is due to you, our dedicated employees. Last year has been a great year as far as achieving our targets are concerned. We are stepping in this New Year with a lot of new ideas and new energy. I would like to thank every one of you for your hard work, passion, and the part that you have played in our company's success. I look forward to your continued support as, together, we take RLDA into 2021. Let me again take this opportunity to wish you and your families a happy and prosperous Year.

Shri Ved Parkash Dudeja
(Vice Chairman)

Message from Member, Revenue

Dear Friends,

At the very outset, I would like to extend my warm wishes for the New Year to you and your loved ones! Happy New Year!

The overwhelming response to the inaugural edition of RLDA Connect was a great experience for me. I am immensely pleased to interact with you through this second edition for which I was waiting eagerly. RLDA Connect through views and opinions enhances awareness on RLDA's vision and initiatives, besides highlighting dedicated efforts made since the previous issue.

Last year was replete with unusual challenges and we faced many difficulties but sailed through it successfully. It was a great year for us, kudos to a collective effort by the entire RLDA family.

Despite odd times, we initiated several commercial projects, multifunctional complex, colony and station redevelopment projects during the previous quarter. We made several collaborations for the same, bringing big players on-board. These ambitious projects will not only ensure optimum use of vacant land, but also encourage infrastructural development in nearby areas which further stimulates economic activities and growth.

We have established communication with all our stakeholders and kept them involved in the growth process. You are a key stakeholder and a valuable asset. I would like to thank you all for the dedicated effort you are putting in to accomplish the successful execution of tasks we are assigned.

Changes call for innovation, and innovation leads to progress. There is no time like today to implement innovative business ideas and make it a part of the much talked about "New Normal". We at RLDA must think out of the box to earn Revenues, while keeping within the four walls of established canons.
In the New Year, we will work with unflinching vigour we have shown last year and travel extra miles. It is our responsibility to capitalize on opportunities and try to create many more to push the growth of the country. Your integrity, passion for work and commitment has increased hopes of making even greater strides in coming months.

Once again, Happy New Year!

Stay Safe, Stay Happy!

Praveen K Agarwal

From the Editor's Desk

Dear Friends,

When a thought that has been enduring in mind becomes a reality, it is truly an interesting and exciting experience. We are glad that the previous edition of 'RLDA Connect' was well received and here we are with our second issue. This issue of the newsletter heralding New Year 2021 gives us an opportunity to reflect on how far we have progressed in the difficult year gone by and focus on the upcoming challenges and opportunities.

The star of the moment is, undoubtedly, our beloved and respected Vice-Chairman, Shri Ved Parkash Dudeja. In recognition of his valuable contribution, he was awarded the prestigious 'Infra Business Leader of the Year' Award- 2020 by the Rail Infra and Mobility Business Digital Awards (RIMBDA). He has recently been presented with 'Lifetime Achievement Award' at Realty+ E- Conclave and Excellence Awards- 2020. He was also invited to be a part of Global Leadership Summit.

These awards occupy a pride of place in our hearts as they indicate growing recognition of RLDA in business circles. We can surely say that it was a great year for us.

The year 2020 has been a sweet and sour year for all but we have successfully sailed through it. I thank you all for your support and as we travel together in our journey to shape new India, our resolve only grows stronger.

In this New Year 2021, I want to extend my heartfelt greetings for the season and convey my appreciation of the entire Team RLDA for the accomplishments and achievements during last year, both individually and as a team. Three cheers for a bountiful year ahead!!

Muktesh Mittal
(General Manager)

Updates@RLDA

Shri Ved Parkash Dudeja, Vice Chairman, Rail Land Development Authority has been conferred with the coveted 'Lifetime Achievement Award' at Realty+ E- Conclave & Excellence Awards

Shri. Ved Parkash Dudeja, Vice Chairman, RLDA shares his vision and plan for the redevelopment of Indian #railwaystations to world-class hubs on the 3rd day of Asia Pacific Rail 2020 on 12th November.

RLDA observed Vigilance Awareness Week, under the theme 'Integrity - A Way of Life' from 27th October to 2nd November.

Pictorial view of Gomtinagar railway station

Lease Agreements Signed

- RLDA leased out 10.76 Ha of railway land at Ashok Vihar, New Delhi to Godrej Properties for launching a premium housing project
- 0.3 Ha Railway Land at Etawah with M/s Madan Infra developers Pvt Ltd.

Railway Station Redevelopment

- RLDA has called RFQ for its flagship project of Re-development of New Delhi Railway Station.
- RLDA, in partnership with NBCC. is undertaking the redevelopment of Gomti Nagar Railway Station, Lucknow on EPC mode.
- RLDA has invited online bids to seek consultancy services for undertaking Feasibility Study, Detailed Master Planning, Urban Designing, and Engineering & Preparation of Detailed Project Report (DPR) for the Integrated Re-development of Ahmedabad, New Jalpaiguri, Singrauli, Alipurduar and Kozhikode Railway Stations.
- RLDA will undertake the redevelopment of Panipat Railway Station of Northern Railway. The objective of the redevelopment is to upgrade it in line with global standards and offer state-of-art amenities for the convenience of commuters.

Colony Redevelopment

- RLDA has invited online bids for the redevelopment of Vasundhara Loco Railway Colony (Varanasi), Chilkalguda and Rifle-range colony (Hyderabad) and Boulevard Road Colony (Delhi).

Leasing of land

- RLDA has invited online bids for leasing a land parcel for 99 years at Aurangabad, Maharashtra having an area of 3.5 Hectares, MTS Colony Karwar Road (Hubli) having an area of 5.26 Hectares, Platform Road Bangalore (1.0 Ha) and two land Parcels of Katra (0.75 Ha & 0.78 Ha). These land parcels are suitable for commercial, residential, or mixed land use development.

Creative Corner

Our primary focus of the year 2020 was to disseminate awareness and build a strong recall about the vision., mission and key functions of RLDA among our stakeholders. The key achievement of the marketing function has been the positioning of the RLDA as an apex body committed to the monetization and redevelopment of the Railway land by adhering to sound architectural principles to shape the vision of the New India. The year witnessed a flurry of activities with the objective to reinforce RLDA's expertise in consultancy, construction and management services in the field of real estate. RLDA sensitized and interacted with media regularly for the protection of its interests. Some of the initiatives included regular press release dissemination on pre-bid meetings and tenders floated in commercial development, station redevelopment and colony development projects and placement of authored articles on behalf of VC Sir in the media for building thought-leadership. RLDA has been featured in leading publications such as The Financial Express, The Hindu Business Line, The Economic Times, Amar Ujala, The Statesman and many more.

Social media has become a vital tool for new-age organizations to maximize stakeholder engagement. Taking cognizance of its significance, RLDA also built and strengthened the presence on social media- Facebook, Twitter and LinkedIn. In the domain of internal communication, the inception of the newsletter 'RLDA Connect' was a milestone that will enable us to maximize engagement with Team RLDA.

It is heartening that RLDA's efforts are gaining visibility and recognition in the media. Our Vice Chairman Shri Ved Parkash Dudeja, was conferred with the coveted 'Lifetime Achievement Award' at Realty+ E- Conclave & Excellence Awards- 2020. He was also awarded 'Infra Business Leader of the year by the Rail Infra and Mobility Business Digital Awards (RIMBDA). These achievements resulted in more visibility of RLDA and RLDA is gaining popularity and becoming a big Brand in Real Estate Development.

The New year brings a lot of hope and aspirations. As a responsible organization, we are committed to the vision of shaping New India through professionalism, integrity and expertise.

Wishing all a Very Happy, prosperous and Healthy New Year, 2021.

Deepak Gupta
(Manager – Marketing, RLDA)

5 Trains that changed the world

1. Liverpool and Manchester Railway

The 31-mile railway that connected Liverpool and Manchester was a game-changer in the history of steam-powered rail travel. Capable of travelling at 30 miles per hour, it carried both people and freight for the first time and linked Manchester and Liverpool. It ferried cotton from the port of Liverpool to the mills of Manchester and fuelled the Industrial Revolution in Europe.

2. Panama Railway

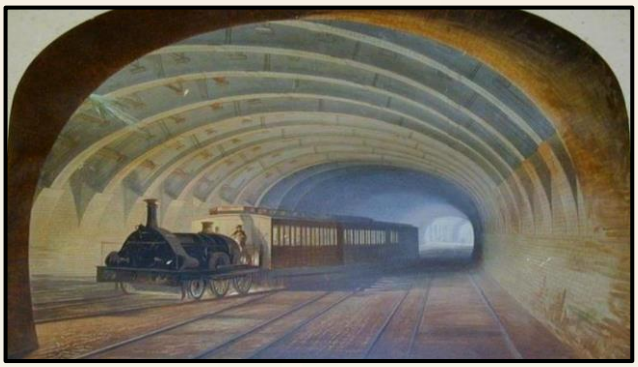
The Panama Railway was the first to connect the Atlantic and Pacific Oceans. Completed in 1855, it eased the journey from the east to the west coast of the United States. It was the most intensively used freight rail line until the opening of the Panama Canal in 1914.

3. Eurostar

The Eurostar connected England to continental Europe for the first time in 1994, through an underground tunnel under the English Channel. Completed at 16 billion USD, the channel connected France and England at a travel time of two-and-a-half hours.

4. Metropolitan Underground Railway

The railway age reached new heights when trains began to operate at unprecedented depths below the streets of London on January 10, 1863, with the inauguration of the Metropolitan Underground Railway. It carried more than 30,000 passengers who rode in gas-lit wooden carriages hauled by steam locomotives.



5. Tokaido Shinkanse

The train ushered Japan into a new era of high-speed rail travel by slicing the time difference between Osaka and Japan into half. With an average speed of 125 miles per hour, the train was indicative of Japan's rise as a post-war industrial powerhouse.

THE ECONOMIC TIMES

Rly Stations Revamp to bring in ₹ 50,000 Crore Investment

Will free up 20 m sq ft realty; tender issue likely to start in March

Faizan.Haidar@timesgroup.com

New Delhi: The station redevelopment plan of Indian Railways will release about 20 million sq ft of real estate, attracting investment of ₹50,000 crore, said senior railways officials. Of the 123 stations on the list for redevelopment, railways aims to issue tenders for 50 by March 2021.

In the current financial year, work will be awarded for major stations including those in Delhi, Mumbai, Nagpur, Amritsar, Dehradun, Nellore, Tirupati and Puducherry.

"As railway stations capture the maximum footfall amongst all modes of transport, there is vast potential to capitalise on the real estate assets. It's an excellent opportunity for investors, as these stations ensure maximum visibility to an already thriving ecosystem," said Mitu Mathur, director, GPM – Architects and Planners, which is part of multiple redevelopment projects.

According to Rail Land Development Authority (RLDA) and Indian Railway Stations Development Corporation (IRSDC), which are executing the project, leading private firms including France's SNCF, Tata, Anchorage, I Squared Capital, Adani, GMR and some foreign funds have shown interest in most of the projects.

"The real estate ecosystem is a formidable part of these projects as most stations will be developed under the public-private partnership. This model has emerged as a scalable and viable solution worldwide to ensure private sector participation in economic development," said Ved Prakash Dudeja, vice chairman, RLDA.

Plan to decongest Delhi in works: RLDA

Shreya Nand
shreya.n@livemint.com
NEW DELHI

RLDA is working on a ₹900-crore investment plan to revamp the road network in and around New Delhi railway station. MINT

The Rail Land Development Authority (RLDA) is working on a ₹900-crore investment plan to revamp the road network in and around New Delhi railway station to help ease congestion. The initiative is part of the New Delhi station redevelopment programme.

"We will develop an exclusive road network for decongesting the area around New Delhi station so that people don't have to go around Connaught Place to reach the station," said RLDA vice chairman Ved Parkash Dudeja in an interview.

The Indian Railways is focusing on modernizing and transforming key railway stations across the country and turn them into commercial hubs, under its ambitious asset monetization programme.

The process of request for qualification (RFQ), in which bidders will be pre-qualified and shortlisted, is expected to roll out in November, Dudeja said. The project will be implemented in phases, including station redevelopment, development of associated infrastructure, relocation of social infrastructure, and refurbishment of railway offices and quarters.

"We are doing a master plan for the entire area around New Delhi station...we will come up with an integrated township, along with a world-class road network. In phase-1, the station will be redeveloped, and in the second phase, colony redevelopment will start after bidding out the station. The second phase will only start in 2021-22," Dudeja said.

The entire project will be developed on a public private partnership model and will be completed in four years, he said. The estimated cost of the project is ₹6,500 crore.

Last month, RLDA had said a pre-bid meeting was held on the redevelopment of the railway station, which saw 'enthusiastic participation' from 20 companies, including France's Société Nationale des Chemins de Fer, Arabian Construction Co., Anchorage Infrastructure, the Adani Group, and GMR.

RLDA is a statutory authority under the railway ministry and develops vacant railway land for commercial use.

"We are targeting to bid out 20 railways stations and 21 colonies in this financial year, depending upon how the covid-19 situation pans out. We will go out in a big way in these two areas," Dudeja said.

THE TIMES OF INDIA

Bullet trains: Bids invited for Sabarmati depot

TIMES NEWS NETWORK

Ahmedabad: The National High-Speed Rail Corporation Limited (NHSRCL) has invited bids for the preparatory works for the construction of Sabarmati Maintenance Depot for bullet trains.

The Rail Land Development Authority (RLDA) has invited online bids to seek consultancy services for undertaking feasibility study, detailed master planning, urban designing, and engineering & preparation of detailed project report (DPR) for the integrated redevelopment of Ahmedabad railway station. The objective of the redevelopment is to upgrade it in line with requirements over time without diluting historical significance, besides providing state-of-the-art passenger amenities. Ahmedabad railway station has 12 platforms at the station. The station premises also houses two minarets as remnants of Sidi Bashir Mosque that are deemed as a heritage structure. The station handles an average footfall of around 52,843 commuters daily.

The redeveloped station will be equipped with amenities such as segregation of arrival and departure, excellent road connectivity with multi-modal transport integration, security and surveillance systems.

Largest of three depots

The NHSRCL officials said that the Sabarmati maintenance depot will be the largest depot among the three depots planned for Mumbai Ahmedabad High Speed Rail corridor. Other depots will be at Surat and Thane. The NHSRCL tender includes road works, sewage and drainage works, earth work, construction of reservoirs for storage of rooftop rain water and storm water, underground storage tanks, sheds for parking of the general inspection train and inspection cars for track and other civil works at the site marked for the Sabarmati depot. The Sabarmati depot will cover an area of approximately 84ha. TNN

RLDA invites bids for redevelopment of Ahmedabad railway station (14 minutes ago)

New Delhi, Oct 20 (IANS) The Rail Land Development Authority (RLDA) has invited online bids to seek consultancy services for undertaking feasibility study, detailed master planning, urban designing and engineering and preparation of detailed project report (DPR) for the integrated redevelopment of the Ahmedabad railway station.

The Indian EXPRESS

Online bids called for redeveloping Ahmedabad railway station

Ahmedabad: For the redevelopment of Ahmedabad Junction Railway Station (also known as Kalupur railway station), the Rail Land Development Authority (RLDA) has invited online bids to seek consultancy services for the project work in order to ensure that the upgradation work is done to provide state-of-the-art facilities at its premises while keeping its historical significance intact.

As per officials of the RLDA , a statutory body under the Ministry of Railways, online bids have been sought for the integrated redevelopment of Ahmedabad Railway Station where the applicants will be expected to render consultancy services for feasibility study, detailed master planning, urban designing, and engineering and preparation of Detailed Project Report (DPR).

The RLDA is currently working on 62 railway stations across India in a phased manner. The Ahmedabad Railway Station has a total of 12 platforms and also hosts two minarets that have been deemed as heritage structures.

"Ahmedabad Railway Station is the biggest in Gujarat. Its redevelopment will redefine its aesthetic appeal while keeping its legacy intact. With the Smart City initiative, it will boost tourism and improve real estate prospects," said Ved Parkash Dudeja, Vice Chairman, RLDA. ENS

LAND MONETISATION

The land of opportunity

VED PARKASH DUDEJA

The author is vice-chairman, Rail Land Development Authority

Monetisation of land is a viable option for PSUs and urban local bodies

URBAN LAND IS a tangible asset that has not been tapped to its fullest potential. With the central and state governments facing a dearth of revenue streams, the monetisation of assets is a viable option. Monetisation of land is slowly gaining currency as stakeholders are starting to grasp the idea of unlocking the tremendous benefits of leasing of land.

Monetisation of land is a viable option for public sector undertakings and urban local bodies. It will not only generate a revenue stream, but also entails several other benefits. It puts the land to better use. The commercial development of land accelerates the real estate prospects in the vicinity and fuels the demand for social infrastructure such as retail outlets, hospitals, schools, etc. Apart from accelerating urbanisation, boosts tourism and generates employment. It has cascading effects on economic development and the quality of life of citizens.

Land monetisation will enable the retention of land ownership while realising market rent (if the revenues flow to a public and on agreed principles). It should be a well-thought process, weighing the potential benefits and viability. The expenses and future risks should be considered before choosing a suitable tool. Also, infrastructure-serviced land will fetch better value. Land exchange/swaps can also be used as an alternative to monetisation. The land exchange could with any other government entity. Land monetisation should entail the engagement of all the stakeholders. Mass sensitisation and awareness programmes should be organised for the local community to educate them on the benefits of the process. Every land monetisation process should have a commercial aspect to enable the projects to be self-sustaining and viable.

The crucial step in the land monetisation process is to map the vacant lands across the country and enlist these in the public domain. This step will ensure transparency and accountability in the process. It warrants leveraging public private partnerships (PPP). The PPP model has emerged as a viable option for development over the past few years, as it combines the best of both entities—public and private—to deliver a mutually beneficial outcome. It has been a game changer across the board for performing assets, serve as a benchmark for the rest of the entities to emulate.

The real estate developers and relevant stakeholders in the segment are formidable partners in the process. Partnering with the government can only allow greater alignment to top new avenues and geographical regions, but also diversify their offerings and generate revenue. It reinforces their role in core of building to urban development and shaping the growth trajectory of the economy.

Despite large tracts of commercially-viable land being available, there has been limited progress on this front. The major hurdle is the time-consuming process of approvals. The ease of doing business ranking of India has improved, but measures to the revival of the economy post Covid-19 need to be supplemented by fast-tracking the approval processes. We need to convert this challenge into an opportunity to build an Atmanirbhar Bharat.

The RLDA, a statutory body under the ministry of railways, is entrusted with the development of vacant railway land for commercial use. Currently, Indian Railways has approximately 43,000 hectares of vacant land across India. The RLDA has over 79 sites for leasing, and eligible developers for each will be selected through an open and transparent bid process. The RLDA will also redevelop 84 railway colonies and 62 railway stations. Strategic land monetisation can usher in massive transformation of the urban landscape and contribute to economic development.

The RLDA has over 79 sites for leasing, and eligible developers for each will be selected through an open and transparent bid process. The RLDA will also redevelop 84 railway colonies and 62 railway stations

Decks cleared for redevelopment of Gomtinagar station

PNS ■ LUCKNOW

The redevelopment of Gomtinagar railway station is set to become a reality with the completion of RERA registration and approval of the design by IIT-Delhi. Rail Land Development Authority (RLDA), in partnership with NBCC, is undertaking the redevelopment of the Gomtinagar station.

It is said to be the dream project of local MP and Defence Minister Rajnath Singh and the objective is to provide world-class amenities to commuters. The redevelopment involves two phases; first, mandatory station development comprising station buildings, air concourse, food courts, renovation of platforms and utilities; and second, commercial development, including retail, basement parking and external development.

The total cost estimated is Rs 190 crore for station development and Rs 170 crore for commercial development, including two-years maintenance. The redeveloped station will be equipped with amenities such as segregation of arrival and departure, basement parking, CCTV surveillance, centrally air-conditioned common spaces, an integrated building management system, treated water for horticulture use, and much more.

"Gomtinagar is developing rapidly as a commercial and retail hub. The station is strategically located with excellent connectivity to other parts of the city. The commercial space being constructed for lease sale of 60 years is in the close vicinity of a five star hotel and a prominent shopping-cum-office plaza. "Redevelopment will boost real estate as well as local economy," vice-chairman of RLDA Ved Prakash Dudeja said on Tuesday.

It is an under-construction railway terminus on Barabanki-Lucknow suburban railway and serves Gomtinagar, Indiranagar, Chinhat and Kamta areas. The station currently has three platforms and three more are under construction. Railway has approximately 38 acres of land parcel at Gomtinagar station, of which 8 acres is being utilised for both redevelopment & retail and commercial development.

THE TIMES OF INDIA

World-class rly terminus in Gomtinagar to start by 2022

RLDA, NBCC To Complete ₹360-Cr Project In Two Phases

Railways has approximately 38 acres of land at Gomtinagar railway station, of which 8 acres land is being utilised for both station redevelopment and retail and commercial development. The property has frontage on Gomtinagar main road which further connects Shaheed Path

TIMES NEWS NETWORK

Lucknow: With the completion of RERA registration and approval of design by IIT-Delhi, the redevelopment of Gomtinagar railway station will be over by the end of 2022.

The idea of redevelopment was in the pipeline since 2013.

Rail Land Development Authority (RLDA), in association with government's construction arm National Buildings Construction Corporation (NBCC), will undertake the redevelopment of the station.

RLDA is a statutory body under the ministry of railways for development of railway land.

Redevelopment will be carried out in two phases —mandatory station development (comprising station buildings, air concourse, food courts, renovation of platforms and utilities) and commercial development including retail, basement parking and external development.

"The total construction cost estimated for station development is Rs 190 crore and Rs 170 crore for commercial development, including maintenance cost for two years. The redevelopment of station will be on the engineering, procurement and construction (EPC) mode," said RLDA vice-chairman Ved Parkash Dudeja.

"Lucknow's Gomtinagar area is developing rapidly as a commercial and retail hub. The station is strategically located with excellent connectivity to other parts of the city. The commercial space being constructed for lease sale of 60 years is in close vicinity of a five star hotel and a prominent shopping-cum-office plaza. "Redevelopment will boost real estate as well as local economy," said Dudeja.

Railways has approximately 38 acres of land parcel at Gomtinagar railway station, of which 8 acres land is being utilised for both station redevelopment and retail and commercial development. The property has frontage on Gomtinagar main road which further connects Shaheed Path.

Presently, two commercial towers—Block R1 and Block R2 having a combined built-up area of 4,53,000 sq ft - have been offered by NBCC as parts of commercial development. This will comprise retail outlets and parking among other facilities. The average lease price is pegged at Rs 6,625 per sq ft for Block R1 and Rs 5,900 per sq ft for Block R2.

The e-auction for commercial blocks is currently underway with the bidding has to be closed on November 23.
