Message from VC, RLDA

Dear RLDA Family,

Warm Greetings!

I am happy to introduce 'RLDA Connect', our organisation's first newsletter to you. The inception of the newsletter is a major milestone in our efforts to foster people-centric culture and maintain an uninterrupted flow of communication, both of whom have assumed paramount importance during COVID-19. I am glad to share my thoughts in this inaugural edition and hope that this initiative will go a long way in keeping us connected.

As India shifts gears into Unlock 4.0, all of us are determined to embrace the 'New Normal' at the workplace with renewed vigour. Adopting social distancing and adhering to the necessary precautions and safety measures is the key to maintaining resilience while ensuring seamless operations. RLDA has been able to sustain the momentum through extensive use of digital technology and collaboration during the lockdown. Most of the bid meetings were held online while majority of our staff worked from home. Our employees enthusiastically came forward to proffer 1- day's salary to PM Cares Fund, contributing to the wellbeing of the underprivileged. Such initiatives underscore our commitment to augmenting the government's efforts to tackle the unprecedented challenges in the building of 'New India'. As a responsible organization, we envisage to shape the discourse of India's progress through the redevelopment of residential and commercial spaces, renovation of pre-existing properties, better land use and monetization of vacant railway land parcels with the Railways, thereby implementing Government of India's mission of creating job opportunities and employment generation.

Our key mandate is the redevelopment of Railway Stations across India on a PPP Model in line with Smart City Projects launched by the Government of India. Presently RLDA is redeveloping 62 stations. These redeveloped stations will exemplify a balance between modernity in line with the changing times while highlighting the traditional architecture to reinforce their historical significance.

The redevelopment of the New Delhi railway station is without doubt our flagship project. Being the national capital, New Delhi is a nerve centre of political, commercial and tourism activities. The New Delhi Railway Station is one of the highest revenue generators for the Indian railways. The project will transform one of the busiest stations into a world-class multi-modal hub.

The station will be equipped with state-of-the-art amenities such as elevated concourse, multi-level car parking, food courts, hotels, and offices. The initiative is in line with the government's efforts to promote New Delhi as a global tourist destination. On similar lines, we are entrusted with the mandate of redeveloping railway stations of Puducherry, Dehradun, Nellore, Tirupati for which pre-meetings were held during the lockdown. The redevelopment project of a railway colony at Guwahati has been bid out and the colony at Boulevard Road in North Delhi into a premium residential hub has also taken off.

I would also like to congratulate the Team RLDA, as they **made new records of earnings and awarding of lease contracts during 2019-20**. RLDA achieved total earnings of Rs.933 Crore during 2019-20 against Rs.83 Cr during the previous year. This year also saw awarding of record lease contracts with overall value of Rs 1553 crores. Commendable achievements during 2019-20 include awarding of 10.7 hectare land at Ashok Vihar, New Delhi to Godrej Properties Limited for an upfront lease premium of Rs 1359 cr.

Despite a general slump in the real estate market, RLDA could bid out land parcels at Aishbagh (Lucknow), Gwaltoli (Kanpur), Jhansi East and others by shifting its strategy towards tier-II cities.

यह हम सभी के लिए खुशी की बात है कि, संसदीय राजभाषा समिति द्वारा रेल मंत्रालय के अधीनस्थ कार्यालयों के कामकाज में राजभाषा हिंदी के प्रयोग और उसकी प्रगति की समीक्षा में रेलवे भूमि विकास प्राधिकरण (आरएलडीए) का प्रदर्शन संतोषप्रद रहा है। राजभाषा राष्ट्र की एकता, अखंडता तथा उन्नति में महत्वपूर्ण भूमिका निभाती है। विगत वर्षों की भांति ही आने वाले समय में भी दैनिक कार्य में आप सभी हिंदी भाषा का अधिक से अधिक प्रयोग करें ताकि हिंदी के प्रचार-प्रसार के साथ साथ आगामी समीक्षाओं में हमारा प्रदर्शन और बेहतर हो सके।

The last quarter witnessed a continuity in the momentum of operations that is a testimony to our remarkable adaptation to the COVID-19 crisis. I urge all of you to continue adhering to all necessary precautions to ensure your well-being as well as that of the family members. The RLDA management remains committed to providing all necessary facilities, support and assistance to employees and partners. At the same time, we shall continue to give our best to help humanity overcome the pandemic.
Stay Safe,

Shri Ved Parkash Dudeja
(Vice Chairman, Rail Land Development Authority)

Dear All,

It gives me great pleasure to interact with you via this newsletter. RLDA Connect has been envisaged as a platform to share views and opinions and deliberate on various issues. As you know, Business Development is an integral function of RLDA for driving a futuristic strategy to achieve sustainable growth. A robust marketing communication strategy also assumes significance for disseminating awareness on RLDA's vision and initiatives, highlighting its achievements and plans and driving a strong recall among the stakeholders.

RLDA has, in the recent past, taken giant steps towards achieving its vision. Due to all round efforts, the earnings have increased manifold as is evident from an all-time high leasing figure of Rs. 1553 Crores. However, these results may be extensively communicated through all available media / social media platforms to create great goodwill for the organisation.

As a part of our external communication strategy, we are in regular touch with media- our key stakeholder, to sensitize them about our initiatives, achievements, and our prominent role in shaping the trajectory of real estate development. We have received an encouraging response so far with leading mainstream dailies and business publications covering most of the recent developments at RLDA.

Social media has also become a powerful tool to stay connected with our audience. To build a strong recall and a wider reach, we are active on prominent social media platforms such as Facebook, LinkedIn and Twitter and regularly keep our audience abreast of all developments.

I would like to thank my team for their tireless efforts in conceptualizing and implementing this initiative and bringing out this newsletter to showcase our achievements, gain a share of voice among our stakeholders, and set a benchmark in efficiency, integrity, and professionalism amongst Government Entities.

R K Kashyap
(Member - Business Development)

From the Editor's Desk

Dear Readers,

We are glad to bring the inaugural edition of RLDA's newsletter 'RLDA Connect'. The objective of this initiative is to maintain a seamless flow of communication, showcase our achievements and commemorate milestones in the journey of shaping New India. The newsletter will also serve as a medium to keep you updated on how far we have progressed and enable us to reflect, reassess and re-innovate which have gained new currency during this time.

Employees are a valuable resource for the organization. The 'Creative Corner' column of this newsletter has been specifically curated for employees to get their creative juices flowing and displaying it through an article, short fiction, anecdotes and much more. We will also introduce you to some of our colleagues in every edition.

The thrust given by the government laid the recovery path for the Indian economy to tide over the pandemic. Remote working and work from home became a norm rather than an exception. Had it not been the COVID-19 pandemic, the potential of co-operation and collaboration would have remained untapped. RLDA did remarkable work in ensuring continuity through extensive use of technology in the last quarter.

Henceforth, the newsletter will be published quarterly. I urge each one of you to enrich this initiative by sharing your valuable thoughts and feedback.

Muktesh Mittal
(General Manager- M&V and HR)

Updates@RLDA

Shri Ved Parkash Dudeja, Vice Chairman, Rail Land Development Authority has been awarded with the Infra Business Leader of the Year 2020 award for his excellent contributions towards the infrastructure

Shri. Ved Parkash Dudeja, Vice Chairman, RLDA addressed 15th Construction World Architect & Builder Awards on 28th August 2020

यह हम सभी के लिए खुशी की बात है कि संसदीय राजभाषा समिति द्वारा रेल मंत्रालय के अधीनस्थ कार्यालयों के काम काज में राजभाषा हिंदी के प्रयोग और उसकी प्रगति की समीक्षा में रेलवे भूमि विकास प्राधिकरण (आरएलडीए) का प्रदर्शन संतोषप्रद रहा है। राजभाषा राष्ट्र की एकता, अखंडता तथा उन्नति में महत्वपूर्ण भूमिका निभाती है। सरलता, सुगमता और स्पष्टता के कारण राज भाषा हिंदी देश की सबसे अधिक बोली जाने वाली भाषा है। हिंदी सिर्फ भाषा नहीं संस्कृति भी है इसलिए इसे संजोए रखने के लिए इसके प्रचार-प्रसार को बढ़ाना होगा। विगत वर्षों की भांति ही आने वाले समय में भी दैनिक कार्य में आप सभी हिंदी भाषा का अधिक से अधिक प्रयोग करें ताकि, हिंदी के प्रचार-प्रसार के साथ-साथ संसदीय राजभाषा समिति की आगामी समीक्षाओं में हमारा प्रदर्शन और बेहतर हो सके।

Railway Station Redevelopment

- RLDA has floated a Request for Qualification (RFQ) for Re-development of New Delhi Railway Station project. A online pre-bid meeting was also concluded successfully that witnessed the participation of 25-30 leading global firms such as The Société Nationale des chemin de fer français (SCNF), Arabian Construction Company, TATA Group, Anchorage Infrastructure, Adani, GMR, ISQ and many more

- RLDA also conducted online pre-bid meetings for the redevelopment of Puducherry, Tirupati, Dehradun and Nellore railway stations.

- RLDA awarded the contract for conducting pre-feasibility study on development and monetization of Mass Transit System between Mathura and Vrindavan

- RLDA has also invited Request of Proposal (RFP) to appoint a of strategic advisor for transaction management of bid process of re-development of New Delhi Railway Station.

Colony Redevelopment

- RLDA had successfully awarded and issued LOA for first Colony Re-development Project of Staff Colony, Guwahati for a Lease Premium of 75.32 Cr.

Multi-Functional Complexes

- RLDA invited RFP for development of 12 Multi-Functional Complexes pan India spread over the states of Karnataka, Rajasthan, Tamil Nadu, West Bengal, Haryana, and Uttar Pradesh.

Leasing of land

- RLDA has successfully awarded & issued LOA of 3 commercial sites amounting to more than Rs. 53 crores
- Rail Land Development Authority (RLDA) has floated Request for Proposals (RFPs) for leasing Plot B of land parcel located at Tambaram, Victoria Crescent, Pulianthope (Chennai), Platform Road (Bangalore) and Katra (J&K)
- RLDA also proposed to invite bids for the commercial development of railway land at Howrah, West Bengal

Creative Corner

Life in The City – Covid Inspired Architecture

The new restrictions placed on society have been a catalyst to rethink much of what we take for granted in the built environment. The way the world has adapted to this new lifestyle may forecast a new normal following the C19 outbreak. The way we design, build, and inhabit cities may never be the same. Now with spending 90% of our lives indoors with the current global health requirement, it is time to ponder on how much city architecture does really need to adapt to this forced situation.

As one moves about early morning, a noticeable change is the number of cycling enthusiasts on the empty streets. The wide-open spaces and empty roads made available by the lockdowns and restricted movements have led to a resurgence of walking and cycling activity. One can visualize a future with empty streets temporarily converted into walking and cycling-only zones and planned integration of walking plazas and pedestrian zones. Also, with the risks associated with enclosed entertainment and shopping avenues, public spaces have been some of the few sources of leisure outside of the home. It is time not only to nurture these spaces but keep these spaces safe in moments like the C19 pandemic. Thus, planning a park that is oriented to maintain social distancing while allowing people to be outdoors, will be the new normal.

Worldwide, people are working from home due to C19 lockdown measures. Large office buildings and skyscrapers in central business districts give a deserted look. Now that work is being done remotely, it may be time to re-evaluate the need for a shift away from large city offices and long-term reallocation of building uses in central business districts. Another design approach that should find favour is adaptive reuse, the process of using existing structures to serve new purposes. This calls for flexible building design, encouraging usage of a series of adjustable walls and screens that would be used to segment an open-plan apartment or office into various dedicated spaces.

WFH will continue, but office life - in some form - will, too. The challenge lies in how to adapt workplaces. Architects will have to find ways of transforming existing offices into places where the six-feet distance rule - which governments may continue to mandate - can be observed. The current pandemic will radically reshape office furniture. Office desks have shrunk over the years, from 1.8-metre to 1.6-metre, to now 1.4-metre and less, but we will see a reversal of that, as people will not want to sit so close together. Corporate office fashion has evolved towards open plan working. But could C19 reverse this mega-trend, leading to a closed-plan future?

Think road markings, but for offices. From badminton-court-style lines in lobbies to standing spots in lifts, and from circles around desks to lanes in corridors, the floors and walls of our offices are likely to be covered in visual instructions. One possible approach is to encourage one-way flow of employees in offices to minimize transmission.

Companies may also need to invest in contactless technologies to reduce disease transmission. 'Contactless pathways' whereby employees rarely need to touch the building with their hands will be the norm, with office doors opening automatically using motion sensors and facial recognition, while lifts - and even a coffee - can be ordered from a smartphone.
We will see wider corridors and doorways, more partitions between departments, and a lot more staircases. Everything has been about breaking down barriers between teams, but there is little possibility spaces will flow into each other so much anymore.

Muktesh Mittal

Motivation Centre

Do you know why Tata Motors named its one of the Multi Utility Vehicles as SUMO, while it could have easily given it any other name? Before you Google, go through this two-minute read to find out:

At Tata Motors, top executives of the company had lunch together every day. However, from some days, one of the executives used to take his car and go out during lunch and come back as soon as the break was over. There was a grapevine that he was offered lunch at a five-star hotel by some dealers.

One day when some executives followed him at lunch, they were surprised to see that he stopped his car at a highway Dhaba, ordered food for him and sat with the drivers of trucks who were eating food at that dhaba. He discussed with them what was good and what was bad in a Tata Truck, jotted down and came back to his office. He used to improve upon the experiences of drivers.

The executive was none other than SumantMoolgaokar who is also known as the architect of Tata Motors. He was the chief executive of Tata Engineering and Locomotive Company. He also remained Vice-Chairman of Tata Steel. Such was his zeal for improving the Tata Vehicles. In Tata Sumo, one of the biggest corporate tributes paid by any company to its executive, Su stands for Sumant and Mo stands for Moolgaokar.

Learning: It's the passion that drives you. You should be passionate about what you do only then you will be able to bring about any significant change.

Rail land development body seeks Bids invited to upgrade railway station

The ₹6,500-crore redevelopment project is targeted for completion in four years

OUR BUREAU
NEW DELHI, August 30

Putting into motion the ₹6,500-crore project to upgrade the New Delhi railway station, the Rail Land Development Authority (RLDA) has invited online bids from private players to redevelop the station into an integrated commercial, retail and hospitality hub.

The project, which is targeted to be completed in four years, will include infrastructure upgrades such as multilevel car parking, refurbished platforms and passenger amenities including lounges and food court, besides office complexes and five-star hotels in the vicinity.

"New Delhi railway station will be transformed into a world-class, one-stop destination for retail, commercial and hospitality business. The development will boost the tourism potential and accentuate real estate as well as investment prospects in New Delhi and surrounding regions," Ved Parkash Dudeja, Vice Chairman at RLDA, said.

The New Delhi railway station will be redeveloped into an integrated commercial, retail and hospitality hub. • FILE

The New Delhi railway station is the largest and the second busiest in the country.

It handles approximately 4.5 lakh passengers and about 400 trains per day.

The project will be developed on a Design-Build Finance Operate Transfer (DBFOT) model for a concession period of 60 years.

The project will include station redevelopment, development of associated infrastructure, upgrade of social infrastructure as well as refurbishment of railway offices and railway quarters.

"Some of the planned redevelopment include an elevated concourse with segregation of arriving and departing passengers; refurbished platforms with easy access from concourse level; mezzanine level exclusively for passenger facilities such as lounges, food courts and restrooms; an elevated road network with multiple entry and exit points; a multi-level parking facility and Green Building provisions such as optimum use of natural ventilation and lighting," it said.

Commercial component

The project will also include a significant commercial component, incorporating a mix of retail, office, and hospitality developments such as 5-star hotels, budget hotels and serviced apartments on approximately 30 acres of land. It also envisages a business district to be located on the outer circle of Connaught Place and near Bhavabhuti Marg, close to Civic Centre.

The station will be integrated with DMRC Yellow Line, Airport Express line and with the Connaught Place outer circle through a pedestrian boulevard.

The concessionaire will earn revenues from several components such as passenger handling fees, and revenue from retail areas, lounges, parking etc.

NDLS revamp to give Lutyens' Delhi a facelift

SHINE JACOB
New Delhi, 10 August

Lutyens' Delhi is on track for a major facelift, with Indian Railways (IR) set to open up New Delhi Railway Station or NDLS — including parts of Connaught Place (CP) and Karnail Singh Stadium — to the private sector for commercial redevelopment.

IR is likely to invite requests for quotation (RFQs) this month for the ₹2,500-crore project, which will result in commercialisation of a 2,30,000-square metre (sq m) area, a flyover to decongest traffic at CP, redevelopment of the stadium, and reconstruction of three railway colonies near the station.

Belgium-based engineering and consulting services major Tractebel is working on a detailed project report (DPR).

The Railway Land Development Authority (RLDA) — a subsidiary of IR — said the first phase of the project would involve development of 110 acres.

"This is going to be a prestigious investment in the heart of the capital. We expect many private players to be in the race. Mandatory cost for the project will be around ₹5,000 crore. This includes the cost for the station building, concourse, and road network (around ₹900 crore) that will decongest traffic in CP. In addition, the developer will invest ₹2,500 crore for the commercial part," said Ved Prakash Dudeja, vice-chairman, of the RLDA.

By December, the RLDA is planning to invite bids for execution from selected bidders, with the project expected to be completed within 4 years of signing of the concession agreement.

The NDLS overhaul will comprise station redevelopment (3,10,000 sq m), a new elevated concourse, renovation of 16 platforms, refurbishment of existing station buildings, development of associated infrastructure, elevated access road network and a multi-level car parking.

Other associated developments to be handed over to Northern Railways will include 40,000 sq m in railway quarters, 42,000 sq m in railway offices, and 7,800 sq m in social infrastructure.

The project is with the Public Private Partnership Appraisal Committee for approval, as well as the finance ministry.

To make it financially viable, the project will include a significant commercial component — entailing a mix of retail, office, and hospitality developments on approximately 30 acres.

The retail space will be of 72,500 sq mt, hotel 35,000 sq mt, and office space 1,03,000 sq mt. It will be on a Design-Build-Finance-Operate-Transfer (DBFOT) basis, for a concession period of 60 years.

This is not the first redevelopment project floated for NDLS. In 2006, Terry Farrell and Partners, a Hong Kong-based architectural firm, had submitted a master plan, including a project of 16 commercial towers from Paharganj to the CP end of the station.

However, the project ran into roadblocks — the proposed shutdown of the station for several months, inclusion of a yard, and the planned 4,60,000-sq mt of commercial space extending up to CP — all of which faced objections from the Delhi Development Authority (DDA).

Tractebel's DPR is based on the Terry Farrell model. According to senior officials in the railways, DDA wanted to limit the quantity of land for commercial development in 2006 as CP was involved. In the new model, therefore, only half the area is kept for commercial redevelopment.

"A group of secretaries is looking into the plan. We have got approvals in place from various departments," added Dudeja. As part of the plan, four colonies around the stations, with 700 houses, will be rebuilt or relocated by the developer.

The selected concessionaire will be able to earn revenue from several components of the project — passenger handling fees via ticket sales; revenues from passenger facilities like retail areas, lounges, parking and advertisement spaces; and income from development and lease of commercial components.

Railways to commercially develop Howrah Salt Golah land

KOLKATA, 17 AUGUST

The Rail Land Development Authority (RLDA) has decided to commercially develop the historically significant railway land-Salt Golah in Howrah- and has invited online bids for engaging marketing and financial consultants.

Notably, the railway land is spread over an area of 89,032 sq. m and includes over 200 godowns with a huge storage capacity.

Constructed in the year 1835, the godowns were used by the British for stocking salt.

The place holds prominence in the history of Indian freedom struggle as it was the salt commissioner of this 'Salt Golah' who had barred the Indians from collecting or selling salt under the Salt Act 1882. The 21-acre heritage property standing on the banks of River Hooghlywas in ruins since decades.

Now, as the RLDA is considering plans of leasing out around 70 sites across the country, it has invited online bids for monetising the railway land at Salt Golah.

According to a statement issued by RLDA, the site is suitable for development of riverfront luxury tourism and water sports hub. It is located on a 20-metre-wide road along the riverbank and is 1.5 km away from Howrah Station. SNS

NON-FARE RECEIPTS
Railways targets to raise ₹23K cr by FY24

NIVEDITA MUKHERJEE
New Delhi, August 7

₹ 7,150 cr from monetisation of commercial plots/vacant lands of 275 hectares

84 colonies (involving land of 610 hectares) being redeveloped, receipts from commercial use seen at ₹5,350 cr

Revenue from revamp of **62 stations** pegged at ₹5,160 cr

New land sites identified for development, to fetch **₹5,500 cr**

WITH ITS FARE revenue stagnating and medium-term capex targets being sky-high, the Indian Railways has lined up plans to boost its other receipts, including through the asset monetisation route.

According to sources, the Railway Land Development Authority(RLDA)has set a target to raise ₹23,160 crore by monetisation of the railways' various assets by FY24-end, including vacant land and commercial plots. The planned mop-up also includes receipts from commercial exploitation of colony redevelopment projects and stations revamp (see chart). At present, RLDA is entrusted with 74 commercial plots, 62 railway stations and 84 colonies for monetisation and redevelopment.

Rail land development body seeks bids for prime property in Chennai

OUR BUREAU
Chennai, August 27

The Rail Land Development Authority (RLDA), a statutory body under the Ministry of Railways, has invited online bids for leasing out a land parcel at Victoria Crescent, Chennai.

The site is adjacent to Ethiraj College and Spencer Plaza and abutted by Cooum river.

The site will be leased out for 99 years for residential development with a reserve price of ₹41 crore for floor space index (FSI) of 1.5.

Eligible developers will be selected through a competitive single stage bid process, according to a press release from the RLDA.

The online pre-bid meeting is on September 9 and the last date to apply is September 15.

The site comes under the jurisdiction of the Chennai Metropolitan Development Authority (CMDA).

The existing land use of the site is primarily residential. The RLDA has invited bids from eligible bidders for the land parcel approximately 4,300 sq m in size.

"The Victoria Crescent site is strategically located and surrounded by an eclectic mix of residential, commercial, retail, institutional and entertainment activities. The site enjoys seamless connectivity with metro station, Chennai airport, and Chennai Central Railway station. Adjoined by Cooum river, the site is perfect for a high-end residential development." said Ved Parkash Dudeja, Chairman, RLDA.

The RLDA was formed for the development of vacant Railway lands for commercial use in line with the objective to generate revenue by non-tariff measures. Currently, Indian Railways has approximately 43,000 hectares of vacant land across India.

The RLDA has over 79 sites across India for leasing and the eligible developers for each will be selected through an open and transparent bid process. It is currently handling 84 railway colony redevelopment projects and has recently floated out a railway colony in Guwahati redevelopment.

The RLDA has also embarked upon a station redevelopment programme, with 62 railway stations including New Delhi, Tirupati, Dehradun, Nellore and Puducherry, being taken up in a phased manner, the release said.

आरएलडीए उपाध्यक्ष वेदप्रकाश को डुडेजा बिजनेस लीडर पुरस्कार

बरेली। रेल विकास विकास प्राधिकरण (आरएलडीए) उपाध्यक्ष वेदप्रकाश को डुडेजा इंडिया बिजनेस लीडर ऑफ द ईयर पुरस्कार से सम्मानित किया गया है। उनके कार्यकाल में आरएलडीए ने रिकॉर्ड तोड़ व्यवसाय किया है। आरएलडीए रेलवे मंत्रालय की स्वायत्तशासी संस्था है, जो कि रेलवे की खाली और निष्प्रयोग भूमि को व्यावसायिक उपयोग के लिए विकसित करती है। बरेली में रेलवे जंक्शन पर पहला होटल और अब चौपुला स्थित पूर्वोत्तर रेलवे की आवासीय और मनोरंजन सदन की खाली भूमि पर कामर्शियल प्रोजेक्ट तैयार किया जा रहा है। इसके लिए निविदाएं भी पिछले दिनों मांगी गई थीं।

आगरा में आरएलडीए बनाएगा मल्टी फंक्शनल कॉम्प्लेक्स

मल्टीफंक्शनल कॉम्प्लेक्स (एमएफसी) का निर्माण रेलवे स्टेशनों के आगमन और स्टेशन परिसर के समीप किया जाएगा जिससे यात्री सुविधाओं को बढ़ावा का मिले

SPECIAL मल्टीफंक्शनल कॉम्प्लेक्स का विकास करेगा, इसके लिए प्राधिकरण ने रिवाइज्ड ऑर्डर ऑफ (आरएफओ) भारी है. मल्टीफंक्शनल सेंटर(एमएफसी) रणनीति स्टेशन के आगमन व रेलवे स्टेशनों के परिसरों क्षेत्र में आते है. आगरा की राजा की मंडी में स्थित इस साइट का कुल भूखंड क्षेत्र लगभग 1017 वर्गमीटर और निर्माण क्षेत्र 1526 वर्गमीटर है. इस भूखंड की सीमा करीब 337 लाख रुपए है. एमएफसी रेलवे स्टेशनों पर स्टेशन, पड़ व्यापि/ रेलवे, बुक स्टोल, रेटोरेंट, मेडिसिन और वेरायटी स्टोर, बजट होटल, पार्किंग स्पेस और रेल उपयोगकर्ताओं के लिए अन्य समान सुविधाएं जैसी कई सुविधाएं प्रदान करते है. एमएफसी के विकास के लिए स्थानीय अधिकारियों से मंजूरी की आवश्यकता नहीं है क्योंकि ये रेलवे के भी परिसरान भाग्ने के रूप में घोषित किए गए है.

आगरा की राजा की मंडी में स्थित इस साइट का कुल भूखंड क्षेत्र लगभग 1017 वर्गमीटर और निर्माण क्षेत्र 1526 वर्गमीटर है. इस भूखंड की सीमा करीब 337 लाख रुपए है. रेलवे स्टेशन के साइट क्षेत्र लगभग 45 साल के लीज पर दी जाएगी

आरएलडीए क्या है?
रेल भूमि विकास प्राधिकरण (आरएलडीए) रेल मंत्रालय के अधीन एक सार्वजनिक उपक्रम है. इसकी स्थापना दिनांक 14 अप्रैल 2020 को की गई थी. यह प्राधिकरण विकास प्रबंधन के लिए हुई थी. वर्तमान में, भारतीय रेलवे के पास पूरे देश में लगभग 43,000 हेक्टेयर खाली भूमि है.

एक छत के नीचे मिलेंगी कई सुविधाएं
रेल भूमि विकास प्राधिकरण के कामकाज के दायरा बढ़ाने के लिए हुई है. आगरा के राजा की मंडी में रेलवे भूमि पर एक ऐसा मल्टीफंक्शनल कॉम्प्लेक्स बनाया जाएगा, जिसमें बुकिंग ऑफिस, वेटिंग रूम, पार्किंग, रिटेल स्टोर, रेस्टोरेंट, मेडिसिन और वेरायटी स्टोर, बजट होटल, पार्किंग स्पेस और रेल उपयोगकर्ताओं के लिए अन्य समान सुविधाएं जैसी कई सुविधाएं प्रदान करते हैं. इसके लिए प्राधिकरण ने रिवाइज्ड ऑर्डर ऑफ (आरएफओ) भारी है. मल्टीफंक्शनल सेंटर(एमएफसी) रणनीति स्टेशन के आगमन व रेलवे स्टेशनों के परिसरों क्षेत्र में आते है. आगरा की राजा की मंडी में स्थित इस साइट का कुल भूखंड क्षेत्र लगभग 1017 वर्गमीटर और निर्माण क्षेत्र 1526 वर्गमीटर है. इस भूखंड की सीमा करीब 337 लाख रुपए है. एमएफसी रेलवे स्टेशनों पर स्टेशन, पड़ व्यापि/ रेलवे, बुक स्टोल, रेटोरेंट, मेडिसिन और वेरायटी स्टोर, बजट होटल, पार्किंग स्पेस और रेल उपयोगकर्ताओं के लिए अन्य समान सुविधाएं जैसी कई सुविधाएं प्रदान करते हैं. इसके लिए प्राधिकरण ने रिवाइज्ड ऑर्डर ऑफ (आरएफओ) भारी है. मल्टीफंक्शनल सेंटर(एमएफसी) रणनीति स्टेशन के आगमन व रेलवे स्टेशनों के परिसरों क्षेत्र में आते है. आगरा की राजा की मंडी में स्थित इस साइट का कुल भूखंड क्षेत्र लगभग 1017 वर्गमीटर और निर्माण क्षेत्र 1526 वर्गमीटर है. इस भूखंड की सीमा करीब 337 लाख रुपए है. एमएफसी रेलवे स्टेशनों पर स्टेशन, पड़ व्यापि/ रेलवे, बुक स्टोल, रेटोरेंट, मेडिसिन और वेरायटी स्टोर, बजट होटल, पार्किंग स्पेस और रेल उपयोगकर्ताओं के लिए अन्य समान सुविधाएं जैसी कई सुविधाएं प्रदान करते हैं. इसके लिए प्राधिकरण ने रिवाइज्ड ऑर्डर ऑफ (आरएफओ) भारी है. मल्टीफंक्शनल सेंटर(एमएफसी) रणनीति स्टेशन के आगमन व रेलवे स्टेशनों के परिसरों क्षेत्र में आते है. आगरा की राजा की मंडी में स्थित इस साइट का कुल भूखंड क्षेत्र लगभग 1017 वर्गमीटर और निर्माण क्षेत्र 1526 वर्गमीटर है. इस भूखंड की सीमा करीब 337 लाख रुपए है. एमएफसी रेलवे स्टेशनों पर स्टेशन, पड़ व्यापि/ रेलवे, बुक स्टोल, रेटोरेंट, मेडिसिन और वेरायटी स्टोर, बजट होटल, पार्किंग स्पेस और रेल उपयोगकर्ताओं के लिए अन्य समान सुविधाएं जैसी कई सुविधाएं प्रदान करते हैं.

Redevelopment of Tirupati, Nellore railway stn gains pace

EXPRESS NEWS SERVICE

RAIL Land Development Authority (RLDA) has concluded online pre-bid meetings for the redevelopment of Nellore and Tirupati railway stations.

The RLDA estimated the total cost of the projects to be ₹130 crore for Nellore and ₹510 crore for Tirupati, including the cost of the station development portion — ₹53 crore for Nellore and ₹230 crore for Tirupati.

Around 25 to 30 prominent firms such as GMR, Oberoi, Ambience, Adani Group, Godrej Properties, Reliance Infra, Sobha, Brigade and Embassy Group participated in the pre-bid meetings. Earlier, the RLDA had floated an RFP (Request for Proposal) inviting bids for the selection of a suitable public or private entity for re-development of Nellore and Tirupati railway stations.

Both stations will be redeveloped under PPP (Public-Private Partnership) mode. The redeveloped stations will have administrative areas, miscellaneous technical area, security, and station operation staff areas besides amenities for passengers such as shopping and hospitality centres, food court, cloakroom, dormitories and executive lounges.

"Amidst the lockdown induced by COVID-19, we conducted online pre-bid meetings for both Nellore and Tirupati successfully. This is in line with our commitment to ensure seamless operations during this unprecedented time. We have also started the online tender process," said RLDA vice-chairman Ved Parkash Dudeja.

Enhanced prospects for IR land development projects

2019 could well be a watershed year for RLDA, the IR's arm for leveraging the land it holds at premium locations across the country.

VP Dudeja, Vice Chairman, Rail Land Development Authority (RLDA) looks at the 2019 results as one of resolution of the structural issues that had held back progress since RLDA started operations in 2008. The 2020-21 expectations are for a business volume of ₹ 3340 Cr, up significantly from 2019-20 volume of ₹2711 Cr (₹ 2059 Crin 2018-19).

The 2019 watershed year has generated pace and models for enhanced private sector participation in IR land development. The current project portfolio covers 74 commercial sites and 62 railway stations, augering well for future growth.

Now over a decade

Set up under the Ministry of Railways by an amendment to the Railways Act, RLDA is a statutory authority for commercial land use, generating revenue by non-tariff measures. RLDA is the IR designated authority for leveraging land use for non-fare revenues.

RLDA discharge/tune functions& exercises powers as specifically assigned to it by the IR Board. RLDA is empowered to enter into any agreements on behalf of Central Government and may set up any special purpose vehicle, joint venture, or other legal business entities.

Dudeja attributes the slow inception of past years to the fact that RLDA was limited by the 45-year limitation on leases it could grant as well as delayed development of successful businesses.

"This has been corrected now and the lease periods increased to 99 years like for the Sami Rohilla (New Delhi) projects.

Dudeja adds that out of 74 sites entrusted to RLDA, 22 commercial sites have been leased out for 45/99 years with realised/expected revenue of ₹1782 Cr for IR. Upfront lease premium model through transparent e-bidding System is adopted. Fifty-five more sites with approx. value of ₹ 7700 Cr are available for lease.

Ashok Vihar by Godrej

A successful model for the future could be commercial development over 10.8 hectares in Ashok Vihar New Delhi that

Ved Parkash Dudeja, Vice Chairman, RLDA since April 2019, is a 1986 batch IR Service of Engineers officer. An alumnus of Punjab Engineering College, Chandigarh, he has worked in multiple positions in IR.

Five rly stations in state picked for PPP facelift

Avinash Kumar
avinash.kumar@hdlive.com

PATNA: The East Central Railways (ECR) has decided to develop its five railway stations through public-private partnership (PPP) mode.

Rail Land Development Authority (RLDA) has been assigned to execute the plan at the earliest. The stations Rajendra Nagar Terminal, Muzaffarpur, Gaya, Begusarai and Singrauli will be developed as commercial hubs.

These will be equipped with state-of-the-art amenities such as food plaza, parkingzones with links to platforms, shopping areas, internet, cafeteria and medical emergency booth amongother things.

RLDA vice-chairman Ved Prakash Dudeja said all the five stations will be developed on the pattern of airports and will provide world-class amenities for commuters' convenience.

New Bungalows to Make a Stop at Civil Lines

Railways to pick developer for building luxe accommodation on its plot; expected price: ₹10-20 cr per unit

Faizan.Haidar@timesgroup.com

New Delhi: Delhi's sony Civil Lines, home to posh bungalows and residences of the city's political elite including the chief minister and lieutenant governor, will see new luxury accommodation priced at ₹10-20 crore, thanks to a land asset utilisation plan by the railways.

The Rail Land Development Authority (RLDA) will pick a private developer to build bungalows and pricey three-storey apartment blocks on a 5.38 hectare plot. Currently the area, on Boulevard Road, adjacent to Tis Hazari Metro station near Rajpur Road, is home to ten railway bungalows that will be demolished.

"The railway colony holds great potential...the upscale residential development is envisioned as a self-sufficient neighborhood with state-of-the-art amenities. Its strategic location and excellent connectivity will make it a preferred destination for homeowners," said Ved Parkash Dudeja, vice chairman, Rail Land Development Authority. Railways estimates it will earn around ₹400 crore from the project. It plans to pick the private developer via a tender.

"This kind of land is a gold mine for railways...these bungalows can easily sell between ₹1,50,000 to ₹2,00,000 per sq yard. The developer can plan for bungalows of 1,000 sq yard each. These can be of different categories, from premium to super luxury. Selling in that region won't be difficult at all as there is hardly any inventory available," said Rohit Chopra, founder of Delhi-based mortgage consultancy firm SanD advisory. He said the bungalows can sell for ₹10-20 crore.

"A lot of traditional families of North Delhi, who are looking to upgrade themselves, will get an opportunity. Post-covid, we are going to witness demand for bungalows by the rich as they would want to have open spaces," said Deepak Kapoor, director, Gulshan, an NCR-based developer.

Plan on Track

Development on 5.38-hectare plot after demolishing 10 railway bungalows

INITIAL INVESTMENT ON PROJECT: ₹408 cr (approx)

Developer can construct high-end villas, bungalows or use it for plotted residential development

Due to height restrictions, developer can't construct more than three floors

About 64,000 sq yd will be available for development

AVERAGE RATE IN AREA: ₹1.5-2 lakh per sq yd

Close to Bungalow Zone ➤ 6

Railway colony headed for a plush look with high-end villas, bungalows

Anjana Gandhok
dt@timesgroup.com

New Delhi: As many as 64 high-end duplex villas and bungalows are expected to come up in north Delhi's Civil Lines area with Rail Land Development Authority (RLDA) planning a redevelopment project. Replacing the old railway colony located on Boulevard Road, the project will be spread over an area of 5.38 hectares.

Officials said the total project cost might be close to Rs 400 crore. "There are 64 units planned on the railway colony site. At present, there are 12 to 14 old bungalows and 40 outhouses," added an RLDA official.

The site lies close to the Tis Hazari metro station, the Kashmere Gate metro station and is in proximity to the Bungalow Zone in Civil Lines as well — a high-end neighborhood in north Delhi. The area also boasts of proximity to the Delhi University and the Delhi Legislative Assembly among others.

RLDA says the estimated project time is two to three years. However, work can only begin once the entire railway colony is relocated.

"It will be partially moved to Sarai Rohilla, land for which has been already identified. The relocation there has already begun. The remaining half is likely to be shifted to Sarojini Nagar," said the official, adding compliances and approvals will be finalised during this period.

Due to height restrictions in the area — since it falls in the green zone, officials said the new bungalows will not be taller than likely with one to two floor villas or bungalows. "The height restriction is close to 10 metres so two to two-and-a-half storey bungalows and duplex buildings can be constructed. These will be high-end properties," said an RLDA official.

The project will also have a commercial aspect with 10% of the buildings to be made commercial, towards the main road (Lala Hardev Sahai Marg).

"The proximity to the metro stations and the overall location which is close to IIMT campus, Delhi University and the Vidhan Sabha make it lucrative for homeowners," said RLDA vice-chairman Ved Prakash Dudeja.

RLDA is a statutory body under the Ministry of Railways for the development of vacant railway land. RLDA at present has over 79 sites across the country for leasing and is in the process of identifying developers through a bidding process, officials said.

20 firms show interest to rebuild New Delhi station

At least 20 national and international firms including Société Nationale des Chemins de Fer, Arabian Construction Company, Anchorage Infrastructure, Adani, GMR and JKB Infra have shown interest in the redevelopment of New Delhi railway station. The Rail Land Development Authority conducted a pre-bid meeting on Tuesday in which these industry majors participated.

Adani, GMR among 20 firms keen on revamping New Delhi rly station

SHINE JACOB
New Delhi, 15 September

At least 20 national and international firms, including Société Nationale des Chemins de Fer Français, Arabian Construction Company, Anchorage Infrastructure Investments Holdings, Adani, GMR, and JKB Infrastructure, have evinced an interest in the redevelopment work of New Delhi railway station.

The Rail Land Development Authority (RLDA) has invited online bids from private players to redevelop the station into an integrated commercial, retail, and hospitality hub.

The objective of this ambitious project is to position the station as a multi-modal hub through overhauling of infrastructure and provision of state-of-the-art amenities, such as an elevated concourse and multi-level car parking. The project will be developed on a design-build-finance-operate-transfer model for a concession period of 60 years.

It is expected to incur a capital expenditure of around ₹6,500 crore and is slated to be completed in four years. "The redevelopment of New Delhi railway station has attracted interest from leading global firms. The project aims to transform New Delhi railway station into a world-class transit hub, in line with Prime Minister's vision of New India. This station will be a one-stop destination for retail, commercial, and hospitality. It will also boost real estate and ensure cascading development of New Delhi and surrounding regions," said Ved Parkash Dudeja, vice-chairman, RLDA.

The Rail Land Development Authority has invited online bids from private players to redevelop the station into an integrated commercial, retail, and hospitality hub

The concessionaire will earn revenue from several components, including passenger handling fees collected via ticket sales, revenue from passenger facilities within the station, such as retail areas, lounges, parking, advertisement spaces, and income from the development and lease of commercial components.

The phased redevelopment encompasses station redevelopment, development of associated infrastructure, relocation of social infrastructure as well as the refurbishment of railway offices and railway quarters. Food courts and restrooms, an elevated concourse with segregation of arriving and departing passengers, refurbished platforms with easy access from the concourse level, mezzanine level exclusively for passenger facilities such as lounges, an elevated road network with multiple entry and exit points, a multi-level car parking facility, and green building provisions, such as optimum use of natural ventilation and lighting, will be some of the key highlights of the redeveloped station.

The station is the largest and second busiest in the country and handles approximately 450,000 passengers daily (approximately 160-170 million passengers annually).

It also handles 400 trains per day, which are expected to increase due to higher operational efficiencies resulting from the redevelopment and better yard utilisation.

RLDA is currently working on 62 stations in a phased manner, while its subsidiary, Indian Railway Stations Development Corporation, has taken up another 61 stations. In the first phase, RLDA has prioritised prominent stations like New Delhi, Tirupati, Dehradun, Nellore, and Puducherry for redevelopment.

20 Domestic, Foreign Cos Attend Pre-bid Meet to Redevelop New Delhi Rly Station

Faizan.Haidar@timesgroup.com

New Delhi: Adani Enterprises, GMR, JKB Infrastructure, Arabian Construction Company, Anchorage Infrastructure and France's SCNF are among domestic and international companies in the race to redevelop the New Delhi railway station, entailing an estimated capital expenditure of ₹6,500 crore.

About 20 companies participated in the first pre-bid meeting, the Rail Land Development Authority (RLDA) said in a statement on Tuesday.

RLDA has planned a mix of retail, office and hospitality developments in a 30-acre area near Connaught Place which will help the Indian Railways in redeveloping the New Delhi railway station.

"The redevelopment of New Delhi railway station has attracted interest from leading global firms. The project will also boost real estate and ensure a cascading development of New Delhi and surrounding regions," said Ved Parkash Dudeja, Vice Chairman, RLDA.

Connaught Place, one of the most expensive retail and office destinations in the country, will add 2.5 million square feet of commercial real estate as part of the redevelopment.

The concessionaire will earn revenues from several components — passenger handling fees, ticket sales and revenues from passenger facilities within the station, such as retail areas, lounges, parking and advertisement spaces.

Additionally, revenue will come in from development and commercial real estate leasing.

The developer is expected to give an annual concession fee (ACF) to the authority along with a fixed upfront premium.

The New Delhi station handles about 450,000 passengers daily (about 160-170 million passengers annually). The station handles 400 trains per day, which is expected to further increase.

According to the plans, the station will be integrated with the Delhi Metro Rail's Yellow line, airport express line and with the Connaught Place outer circle through a pedestrian boulevard.

The project would be developed on a Design-Build-Finance-Operate-Transfer model for a concession period of 60 years. The phased redevelopment in four years involves station redevelopment, development of associated infrastructure, upgradation of social infrastructure as well as refurbishment of railway offices and railway quarters.

RLDA invites bids to lease 10,128 sq m plot in Bengaluru

OUR BUREAU
Bengaluru, September 15

The Rail Land Development Authority (RLDA), a statutory body under the Ministry of Railways, has invited online bids for leasing out a land parcel on Platform Road in Bengaluru.

The 10,128 sq m vacant land is located in proximity to the Bangalore City Railway Station as well as the Kempegowda Bus Station.

The land is in a well-developed area surrounded by residential colonies and commercial establishments including lodges, hotels and hospitals.

"The land parcel at Platform Road, Bengaluru is ideal for residential (mixed) use development which will be leased out for 99 years. The land has good connectivity to residential, educational, commercial and retail establishments making it an ideal land bank," Ved Parkash Dudeja, Chairman, RLDA said in a press release.

THE FINANCIAL EXPRESS

Privatisation key to turning rlys into engine of growth, says Kant

FE BUREAU
New Delhi, September 17

THE NITI AAYOG has strongly backed the railways ministry's plan for privatisation of train operations and invited the private sector to invest in this initiative as an opportunity to source and operate modern trains for undertaking passenger business, using the railway infrastructure. In July this year, IR threw open the door to corporates for running private trains and as per the plan, it is looking at 151 trains by the end of FY27, running on 109 routes demarcated into 12 clusters.

"Quality train services, new technology and value-added service will enhance user experience. The modernisation of railways will bring a paradigm shift, as it will help rewrite the growth story of India. This creates a win-win situation for railways as well as investors, by tapping into the potential of a huge unmet demand in the passenger business," said CEO Amitabh Kant, at a press briefing on Thursday.

The proactive efforts of IR to bring in private participation in the operations has attracted significant debate, given the unsuccessful attempts to sell the Air India stake. Kant pointed to the interest shown by as many as 23 companies, including Bombardier, Alstom, Siemens, Mitsui, for private trains, despite the Covid situation. The IR has given interested companies the option to either run their own trains or lease them which is expected to encourage more players to bid for the project.

Starting with 12 trains in 2022-23, IR will introduce 45 trains in 2023-24, 50 trains in 2025-26 followed by 44 in 2026-27. The project would entail a private sector investment of about ₹30,000 crore. The process of allowing private entities to operate passenger trains has been initiated by IR with the request for qualification — floated on July 8. This is likely to be finalised by November, the financial bids will be opened by March 2021 and selection of bidders is planned by April 2021, according to a schedule prepared by IR.

The railways is also pushing ahead with station redevelopment programme on PPP mode. A recently concluded pre-bid meeting by the Rail Land Development Authority on the redevelopment of the New Delhi Railway Station has witnessed participation by 20 national and international firms such as Société Nationale des Chemins de Fer, Anchorage Infrastructure, Adani, GMR. The project is expected to cost around ₹6,500 crore and is slated to be completed in four years. The RLDA is currently working on 62 stations in a phased manner with priority to New Delhi, CST (Mumbai), Tirupati, Dehradun, Nellore, and Puducherry.

Pvt firms can now set fares as rlys revamps

THE RAILWAYS WILL allow private companies to set passenger fares once they start operating train services. "Private players have been given the freedom to fix fares in their own way," VK Yadav, chairman of Railway Board, said on Thursday. But, "air-conditioned buses and planes also operate on those routes, and they have to keep that in mind before setting fares". — BLOOMBERG
