RAIL LAND DEVELOPMENT AUTHORITY

A Statutory Authority Under Ministry Of Railways, Government Of India

RLDA | Q4 - OCTOBER - DECEMBER, 2025

MESSAGE FROM VICE-CHAIRMAN

Dear Friends,

As we advance on our journey of transformation, it is gratifying to see Rail Land Development Authority (RLDA) receiving recognition for its role in shaping modern, passenger-centric railway infrastructure - innovations in Commercial development of Railway assets, and Integrated Station Facility Management (ISFM).

I congratulate Team RLDA for the successful awarding of the Boulevard Road site in Delhi for Rs. 451.56 crore. Furthermore, the commercial development bids of Mahalaxmi, Supari Baug and Bandra East, are expected to generate high revenue.

Our progressive commercial development initiatives continue to strengthen the financial position of Indian Railways. During the nine months of the current financial year, RLDA has achieved a cumulative revenue of ₹350.63 crore. We expect that a string of upcoming sites would achieve high bid award values in the coming months. The completion of the commercial mall at Abu Road, now ready for commissioning, further demonstrates how planned development of railway land is being converted into long-term value for Railways and local Landscape.

This period has also seen important progress in ongoing projects. The redevelopment work of colonies is on a fast pace aiming to achieve commissioning at the earliest. Specifically, the Staff Colony at Guwahati, Rifle Range Rly Colony (Hyderabad), Railway Colony (Bhopal), MG Colony, (Bengaluru), and Bauliya Colony (Gorakhpur) are all scheduled for commissioning in coming time.

Our Integrated Station Facility Management (ISFM) programme has crossed a major milestone with the first ISFM MoU for Gomti Nagar, Lucknow between RLDA and Zonal Railways. Apart from Gomti Nagar, Lucknow RLDA has also issued RFPs for onboarding ISFM agencies for Chandigarh, Gurugram, and Safdarjung Stations in this quarter, ensuring a firm step towards professional facility management and predictable service standards.

A notable achievement is the new Holding Area (Yatri Suvidha Kendra) at New Delhi Railway Station, completed on the Ajmeri Gate side in record time through close coordination with Northern Railway & RITES. The holding area is studded with 22 Ticket Counters, 25 Automatic Ticket Vending Machines, 24 public announcement system speakers, and 150-seat capacity waiting, 18 CCTV cameras and upgraded, dedicated toilet blocks—including women, men, and Divyangjan.

RLDA's active participation in IREE 2025 at Bharat Mandapam, New Delhi served as a premier platform to showcase our diverse project portfolio and innovative development strategies to global industry leaders. This showcase stands as a powerful testament to RLDA's commitment to excellence—demonstrating our ability to deliver effective products that redefine the future of railway land use.

I thank all officers and staff for their continued efforts and look forward to our collective pursuit of excellence.

Warm Regards,
Manoj Garg
Vice Chairman / RLDA

MESSAGE FROM MEMBER PLANNING

Dear Colleagues,

The past months have underscored the consolidation of our new initiatives which were rolled out in previous quarter. RLDA's progressive Revenue Share Model and the ISFM initiative continue to redefine our core activity umbrella. The Revenue Share Model, which is a new approach of sharing gains covers all types of assets, Land plots, Built up spaces and Air spaces. Bids have been invited / under process of inviting for several high-value RLDA projects. Whereas, under the ISFM framework, the appointed agency will manage the station premises for housekeeping, O&M and commercial activities.

On the revenue front, the cumulative achievement of ₹350.63 crore during the nine months of current financial year reflects the effectiveness of our lease Model and steady institutionalized system of Revenue generation. Following the successful awarding of the Boulevard Road site in Delhi, the sites at Mahalaxmi, Supari Baug & Bandra East (all in Mumbai) are expected to achieve high revenue bids, & this would stamp the success of RLDA's revenue share model within the competitive real estate market. Furthermore, the strong response to the vertical air space at Tirupati, demonstrates market confidence in RLDA's frameworks and in the long-term potential of railway locations as vibrant modern commercial nodes.

PERSPECTIVE VIEW OF BANDRA EAST

AERIAL PERSPECTIVE VIEW OF MAHALAXMI, MUMBAI

Adding to this momentum, the Master Planning of colonies is also progressing steadily and the exercise will result in land pool optimization. Simultaneously, redevelopment on our residential colonies is progressing at an optimal pace.

In parallel, RLDA's Integrated Station Facility Management model will help towards, sustained high-quality Station infrastructure upkeep & commercial harnessing. The first ISFM MoU signed with Lucknow division of NER for Gomti Nagar (ISFM) and the RFPs issued for Gomti Nagar, Chandigarh, Gurugram and Safdarjung stations in this quarter, are designed keeping in mind professional facility management and predictable service standards to important passenger hubs. These contracts will also provide critical feedback loops for future station designs.

The recently completed Holding Area at New Delhi Railway Station is a good example of planning translated into quick, effective implementation. Conceived to ease congestion and improve passenger circulation on the Ajmeri Gate side, it was delivered in a short period through close coordination with Northern Railway & RITES. Its success offers a template for similar crowd-management solutions at other high-traffic stations.

Overall, progress across RLDA's initiatives reflects a focused approach towards asset optimization and revenue generation. With strong market response and timely execution, RLDA continues to strengthen railway infrastructure and support Indian Railways' long-term objectives.

Warm Regards
Tarun Kumar Goyal
Member/Planning, RLDA

MESSAGE FROM THE EDITOR'S DESK

Welcome to the latest edition of RLDA Connect! As RLDA continues to lead advancements in India's railway infrastructure, this newsletter captures our progress, objectives, and commitment to delivering excellence. The encouraging feedback to our previous editions has been truly inspiring, and we are glad to reconnect with our readers once again.

In this issue, we spotlight key developments from across RLDA. Our knowledge Centre features the newly inaugurated passenger holding area—also known as the Yatri Suvidha Kendra—at New Delhi Railway Station (NDLS). Built to ease crowd movement and enhance pre-boarding comfort, this dedicated facility is particularly impactful during peak and festive travel seasons.

YATRI SUVIDHA KENDRA—AT NEW DELHI RAILWAY STATION (NDLS)

Our Creative Corner turns the focus to the cutting-edge machinery that is driving RLDA's modern infrastructure initiatives. Whether station redevelopment or railway colony construction, advanced equipment is enabling projects to be delivered faster, with greater precision and enhanced safety—strengthening RLDA's mission of developing future-ready transit hubs.

As always, RLDA remains committed to staying closely connected with stakeholders through X (formerly Twitter), Facebook, LinkedIn, Instagram, and YouTube—sharing our updates, achievements, and ongoing milestones. I extend heartfelt appreciation to our dedicated teams whose hard work and passion continue to make these achievements possible.

Thank you for being an integral part of this journey. Together, let us keep redefining the future of India's railway infrastructure.

Warm regards,
Apurva Agnihotri
General Manager / Security & IT, RLDA

CREATIVE CORNER

ADVANCED MACHINERY POWERING RLDA'S MODERN INFRASTRUCTURE PROJECTS

Building Faster, Safer, and Smarter Station Redevelopment

The Rail Land Development Authority (RLDA), in its mission to reshape railway stations into modern transit hubs, has integrated state-of-the-art construction machinery into redevelopment and EPC projects across India. The deployment of advanced equipment plays a pivotal role in ensuring precision, safety, and accelerated timelines—particularly in dense city or modern environments where railway operations must continue uninterrupted.

A key component of RLDA project execution has been the use of tower cranes such as Zoomlion's T-200Q4G and Zinglo fixed tower cranes, which allow efficient lifting and handling of heavy structural materials during multi-storey construction. These cranes enable seamless vertical and horizontal movement of components, supporting faster assembly and reduced manpower risks. To handle structural works for elevated areas, Boom concrete placers (for concrete placements) and Scissor lifts (installation, inspection, and finishing) are being used.

TOWER CRANE
T-120064Q (ZOOMLION)

FIXED TOWER
CRANE (ZINGLO)

MINI EXCAVATOR
E-20z (BOBCAT)

MAN LIFT

For tight working corridors around railway tracks and built-up areas, Mini Excavator E-20z (Bobcat) and Bobcat loaders offer compact, agile performance, enabling soil removal, leveling, and backfilling without affecting station traffic. Paired with compaction rollers, these machines ensure durable foundations and subgrade strength—critical for platforms and passenger facility structures.

Height-based maintenance and façade development have been strengthened with man lifts and specialized façade machines, ensuring controlled, safe access for exterior works on concourses, entry plazas, and elevated walkways. Additionally, Hydra cranes are deployed for dismantling ageing structures and making way for modern station amenities with minimal disruption, supported by diamond cutters that enable precise, low-vibration cutting during dismantling in live station environments.

Together, this machinery ecosystem streamlines construction processes, boosts worker safety, and maintains continuity of existing railway operations—elements that are crucial to RLDA's redevelopment vision. As RLDA continues to upgrade stations into vibrant, commercial, passenger-centric destinations, the integration of advanced civil machinery remains fundamental to achieving higher speed, precision, and service life in every project delivered.

PASSENGER HOLDING AREA AT NEW DELHI RAILWAY STATION

Ensuring Comfort, Safety & Seamless Crowd Management

The New Delhi Railway Station, one of the country's busiest transit hubs, has taken a significant leap forward in enhancing passenger convenience with the development of a dedicated Passenger Holding Area, built by the Rail Land Development Authority (RLDA) for Northern Railway. Designed to efficiently handle the high traveller footfall during peak and festive periods, this newly created space greatly improves how passenger movement is managed at the national capital's gateway station.

Developed in record time, the Passenger Holding Area supports smoother processes before boarding, while providing a safe and well-organised environment for lakhs of travellers who enter, exit, or transit through New Delhi every day. The Hon'ble Minister of Railways, during his inspection, emphasized the importance of this passenger-centric facility in elevating the overall travel experience.

The Holding Area is equipped with essential and modern amenities, including 22 Ticket Counters, 25 Automatic Ticket Vending Machines for contactless ticketing, 24 public announcement system speakers, and 150-seat capacity for comfortable waiting. To ensure safety and oversight, 18 CCTV cameras are installed, while upgraded, dedicated toilet blocks—including women, men, and Divyangjan facilities—ensure dignity and accessibility for all passengers.

This initiative is a testament to RLDA's ongoing commitment to improving passenger amenities and operational efficiency at major railway stations. The new facility stands as an example of responsive infrastructure development—aligned with the needs of passengers, the aspirations of a modern rail ecosystem, and the continuous journey toward seamless, world-class station experience.

RLDA WELCOMES
DURING THE QUARTER

1. Sh. Awadhesh Kumar, General Manager/Electrical/RLDA
2. Sh. Dharmendra Singh, JGM/Civil/Surat
3. Sh. Shailesh Kumar Sinha, JGM/Civil/MFP/Patna
4. Sh. Mohammad Maaz, Manager/Civil
5. Sh. Durgesh Nandan, AM/Civil/Bhubaneswar

RLDA plans Boulevard Road railway colony redevelopment

Rail Land Development Authority (RLDA) plans to redevelop the Boulevard road railway colony in North Delhi's Civil Lines into a modern residential complex.

Officials said that the colony, a pocket of double-storeyed quarters for railway officers, spread over 21,568 square metres will be redeveloped in phases at an estimated cost of around ₹350 crore.

The land, adjacent to Tis Hazari Metro Station and bounded by the Victoria Girls Senior Secondary School, Tirath Ram Shah Hospital, and DDA flats, falls under the "Residential Bungalow Zone" of Delhi's Master Plan 2021, where no mixed-use activity will be allowed, officials said.

The project will replace 64 existing railway quarters, which the developer will be required to dismantle at their own cost once vacated by the railways.

"The land use strictly remains residential, as per the Civil Lines Bungalow Zone development control norms. The developer will be hired for a 99-year lease," the official said.

The RLDA mentioned that there is an ongoing case for alleged illegal occupation by nine jhuggis on parts of the boundary of the colony. The tender may extend if the removal of encroachments extends beyond 12 to 18 months, officials said.

The official added that the project will retain the low-density character mandated under the Civil Lines zoning norms, with no high-rise commercial towers permitted. Once complete, the project will replace the fading colonial quarters of Boulevard Road with a modern residential enclave, official added.

The tenders for the project were floated last year as well. However, the authority did not get bidders, following which the plan was revised.

गोमतीनगर देश का पहला आईएसएफएम रेलवे स्टेशन

लखनऊ, वसं। रेल भूमि विकास प्राधिकरण ने गोमतीनगर रेलवे स्टेशन पर आईएसएफएम (इंटीग्रेटेड स्टेशन फैसिलिटी मैनेजमेंट) मॉडल की शुरुआत की है। गोमतीनगर स्टेशन इस नए और आधुनिक फ्रेमवर्क को अपनाने वाला देश का पहला स्टेशन बन गया है।

हाल ही में पुनर्विकसित किया गया यह स्टेशन अब सेंट्रल एयर कंडीशनिंग, सीसीटीवी, लिफ्ट और एस्केलेटर जैसी नवीनतम यात्री सुविधाओं से लैस है। यह परियोजना व्यावसायिक उपयोग के माध्यम से कमाई का भी अवसर प्रदान करती है, जिसमें फूड कोर्ट, रिटेल स्पेस और विज्ञापन जैसी सुविधाएं शामिल हैं। गोमतीनगर के बाद आरएलडीए अब चंडीगढ़ रेलवे स्टेशन पर भी आईएसएफएम का विस्तार कर रहा है। आईएसएफएम मॉडल के तहत स्टेशन की सफाई, संचालन व रख-रखाव और कमर्शियल गतिविधियों को एक ही सक्षम एजेंसी द्वारा एक साथ प्रबंधित किया जाता है, ताकि सेवाओं की गुणवत्ता उच्च स्तर की बनी रहे।

LET TRUTH PREVAIL
THE TIMES OF INDIA

Rlys to replicate Gomti Nagar's success at Chd station, bring all services under 1 roof

Barinderjit.Saluja
@timesofindia.com

Chandigarh: In a major step towards transforming passenger experience across the country's railway stations, the Rail Land Development Authority (RLDA) is extending its integrated station facility management (ISFM) initiative to Chandigarh railway station. The model aims to set a new benchmark in station upkeep and passenger comfort.

The ISFM model consolidates housekeeping, operations and maintenance (O&M), and commercial activity into one unified system managed by a professionally competent agency selected through a transparent open bidding process. The initiative is seen as critical to sustaining high-quality standards at the next generation of redeveloped stations coming up across India.

Nitin Sharma

The station caters to important trains including the Shatabdi Express and Vande Bharat, making efficient operational management essential

Highlighting the significance of this reform, RLDA vice-chairman Manoj Garg said, "The ISFM initiative is designed to deliver top-quality maintenance, world-class passenger services, and high-value commercial facilities. By bringing an experienced and competent agency on board, we aim to set a new benchmark for the operation and upkeep of railway stations in India. Chandigarh railway station is just the beginning of a nationwide transformation that will redefine the passenger experience like that at Gomti Nagar."

He said Chandigarh railway station — strategically located near Madhya Marg and serving as a key connecting point between Chandigarh and Panchkula — has been identified as one of the premium stations to be brought under the ISFM umbrella.

RLDA has invited bids for selecting an agency to manage ISFM services for a nine-year period. The reserve annual licence fee for the project has been set at ₹2.88 crore, Garg confirmed. The selected agency will be responsible not only for maintaining the station, but also for improving commuter amenities, ensuring smooth day-to-day operations, and optimising commercial potential.

The Chandigarh station already houses modern infrastructure such as CCTVs, lifts, escalators, solar panels, automated sensor-based entry systems, and an advanced building management system. With the ISFM model, the focus will now shift to maintaining these systems at top efficiency while enriching passenger facilities. Officials believe that the ISFM initiative at Chandigarh is poised to mirror the success of Gomti Nagar station, which has emerged as a model for integrated and professional station management in India.
